Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/564,948	Applicant(s) PUAUX, BERNARD	
	Examiner Shaun R. Hurley	Art Unit 3765	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

Page 1, line 8: "an forward" reads awkwardly

Page 3, line 1: "The fact of" reads awkwardly

Proper sectional headings have been omitted.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, the phrase "namely" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3, 5-7, and 10-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gabalda et al (5950412) in view of Wirz et al (5763859).

Art Unit: 3765

Gabalda teaches a machine (Figures) for continuous cabling and setting of yarns in the same delimited small and compact work position comprising means for cabling a yarn (1), heat setting means, an belt accumulator (11) for cooling and relaxing the yarn in a tensionless state, and driven and guided winding means (13). While Gabalda essentially teaches the invention as detailed, including a godet (5), he fails to specifically teach a heated godet configured conical crimp pick-up and residual shrinkage zones, and a cylindrical setting zone, which Wirz teaches (Figure 1 shows a an angled left side of the godet which angles into a cylinder). Likewise, the godet of Wirz teaches that the length of the setting zone is greater than the sum of lengths of the pick-up and shrinkage zones, follows a curved profile, and is structured for automatic reeving of the yarn. It would have been obvious to one of ordinary skill in the art at the time the invention was made, to have utilized such a godet in place of the godet of Gabalda, so as to more effectively heat treat the yarn. By delivering and preheating the yarn, the device would provide a more controlled heating, which would result in a higher quality product.

Allowable Subject Matter

6. Claims 4, 8, 9, and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Antouly (20050022495), Paepke et al (5927639) and Paepke et al (5820047) all teach what is well known in the art.
